DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-7,9-17,19-21** are allowed. Claims 8 & 18 have been cancelled by Applicant.
2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose or render obvious a landscape border segment, in addition to other well known in the art elements, having a transition region comprises a curved loop structure that exceeds 360 degrees in curvature between the terminating points of the transition region, the transition region terminating in different axial directions, the transition region terminating at first and second termination locations such that the first end is in a first axial direction immediately adjacent to the transition region and the second end is in a second axial direction immediately adjacent to the transition region. The references of Martensen, Miller and Jarl et al. teach similar landscape border segment as the claimed invention. However, these references lack the specific detailed of the transition region as described above. Jarl et al.'s invention appeared to resemble the transition region of the present invention; however, it lacks other elements such as a connection feature to connect one segment to another segment. Modifying Jarl et al. to have connection features would altered Jarl et al's invention because their invention is intended to support a hose and the segments are not intended to be connected together. Modifying Martensen with Jarl et al. for the feature of the loop would be hindsighting Applicant's own invention because of the description of where the transition region starts and ends.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
